Huskpac Series, the next generation rice husk fired boilers from Steamgen & C.,, are designed to provide low cost heating with fuel efficiency as high as 74 %. Bubbling bed combustion, gives higher residence time to facilitate complete combustion, thus improving efficiency.

Product Features

- Low cost heating
- Bubbling bed combustion to enhance output and efficiency
- Rice husk fired boiler
- Top Loading design to avoid nozzle failure & bulging of reversal chamber
- Special ferrules to protect smoke tubes from abrasive husk ash
- Nozzles designed using Computational Fluid Dynamics (CFD) techniques to ensure proper cooling & longer life

Operating Range

- Capacities: From 2 to 6 TPH
- Pressure: From 10.54 to 17.5 Kg/cm² (g)
- Firing fuels: Rice husk
- Efficiency: Overall efficiency of 74 % (+/-2%)
